DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1, 20 and 24 in the reply filed on 0/23/09 is acknowledged.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. **Claim 20** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. **Claim 20** recites the phrase "connected to this eccentric elements" which is awkwardly and confusingly worded.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/561,492 Page 3

Art Unit: 3723

6. Claims 1, 20 and 24, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Novoselsky 4,733,432.

Novoselsky discloses a mechanism comprising a main drive spindle (43) being driven by a power supply (4) and rotatable axially; at least one eccentric element (325) being in communication with the drive spindle and producing eccentric motion; at least one bearing means surrounding the eccentric element (5:23-52); and at least one drive transmitting element (327) being configured to perform an essentially linear movement which is transformed into an orbiting motion of a final drive spindle (326), one of the terminals of the drive transmitting element being connected to the eccentric bearing means and the other terminal to the final drive spindle, the drive transmitting element passing through a drive transferring spindle bearing associated with a supporting piece connected by bearings to the main frame (Figs. 3-7); multiple eccentric elements with drive spindles; and is a cleaning tool (Figs. 1 and 3-7).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALVIN J. GRANT whose telephone number is (571)272-4484. The examiner can normally be reached on Mon-Fri 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail can be reached on (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
